PROFESSIONAL SUMMARY

AI/ML Engineer and Software Engineer with hands-on experience developing scalable machine learning systems, Generative AI solutions, and .NET-based applications. Proficient in Python, C#/.NET, React.js, and cloud AI APIs (OpenAI, Google Gemini). Proven track record of delivering real-world AI projects including CRM automation, RAG-based chatbots, and intelligent document processing systems. Seeking to leverage expertise in AI/ML and software engineering to build impactful products.

TECHNICAL SKILLS

Languages: Python, C#, .NET, JavaScript, PHP

Generative AI: OpenAI GPT, Google Gemini API, LangChain, RAG, Prompt Engineering, NLP, TF-IDF

Web Development: .NET, React.js, Flask, HTML, CSS, JavaScript

Databases: MongoDB, MySQL, SQL Server

Tools & Platforms: GitHub, VS Code, Visual Studio, Postman, VAPI, N8N, Zapier, Make, XAMPP

WORK EXPERIENCE

Software Engineer (.NET)

Jun 2026 – Present

Cloudmex Technologies | Vapi, Gujarat, India

- Working as a Software Engineer developing and maintaining applications using the .NET framework.
- Contributing to software development workflows, collaborating with the team on building and deploying business applications.

AI/ML Intern

Jan 2026 – Apr 2026

Enjay IT Solutions Ltd | India

- Developed real-world AI/ML applications and intelligent automation solutions using Python, reducing manual processing time.
- Built an AI-powered Business Card Scanner leveraging OCR and AI to automatically extract, save, and categorize contact details from physical cards.
- Implemented intelligent data processing pipelines for structured storage and retrieval of customer information in CRM workflows.

AI Intern

Jun 2025 – Jul 2025

IBM SkillsBuild | Remote

- Developed AI-powered applications using Python and Generative AI concepts as part of IBM's structured AI curriculum.
- Built Eva, an interactive AI assistant using React.js and Google Gemini API with real-time dynamic UI interaction.
- Gained applied experience in ML workflows, REST APIs, and real-time AI system integration.

PROJECTS

AI Powered Samridh CRM – AI-Powered CRM System | PHP, MySQL, XAMPP, Generative AI APIs

- Developed a full-featured CRM system with AI-driven lead management and workflow automation. Integrated Generative AI APIs for real-time business insights, lead scoring, and dashboard analytics.

AI Resume Analyzer | Python, NLP, TF-IDF, Cosine Similarity

- Built an NLP-based resume evaluation tool using TF-IDF vectorization and cosine similarity to score resumes against job descriptions and generate AI-driven improvement suggestions.

AI PDF Chatbot (RAG) | Python, FAISS, Embeddings, LangChain

- Designed a document-based Q&A system using Retrieval-Augmented Generation (RAG) with FAISS vector search and text embeddings, achieving high-accuracy responses with significantly reduced hallucination.

Eva – AI Voice & Chat Assistant | React.js, Google Gemini API

- Created a real-time AI assistant with a dynamic React.js UI integrated with the Google Gemini API, supporting conversational AI interactions and voice-based responses.

EDUCATION

Bachelor of Engineering (B.E.) — Computer Engineering <i>Laxmi Institute of Technology CGPA: 9 / 10</i>	2022 – 2026
Higher Secondary (12th Grade) <i>Manasthali Education Centre, U.P. 60%</i>	2020
Secondary (10th Grade) <i>Anita Memorial Convent School, U.P. 66%</i>	2018

CERTIFICATIONS & ACHIEVEMENTS

- Winner – Code Crasher, National Level Tech Fest (1st Place)
- 2nd Place – Brain Buster, National Level Tech Fest
- Java Programming Fundamentals Certification — Infosys
- Code Unnati Program Certification — SAP & Edunet Foundation

ADDITIONAL INFORMATION

- Actively builds and publishes AI, ML, and Generative AI projects on GitHub — demonstrating continuous learning and applied engineering.
- Regularly practices Data Structures & Algorithms (DSA) and explores emerging AI frameworks and tools.
